SUMMARY

Technical Program & Delivery Professional with **6+ years** leading cross-functional, globally distributed teams to deliver complex **Supply Chain, WMS, and Logistics** technology programs. Track record owning program strategy, resource planning, vendor/carrier onboarding, and **SOW creation & optimization** for enterprise retail clients, with strength in **GenAI-driven process optimization**, risk management (DR, security, performance), and client relationship management in fast-paced Agile environments.

CORE SKILLS

Program & Project Management	Resource & Capacity Planning, Agile/Scrum Delivery, SOW Creation & Optimization, Vendor/Carrier Management, Risk & DR Planning, Stakeholder & Client Management, Roadmap Planning
Supply Chain & WMS	Manhattan Active, Manhattan WMS 2013, MHE Systems, AutoStore Systems, ANAPLAN, Outbound Logistics
Data & Programming	SQL (MySQL, PostgreSQL), Python, Pandas, ETL, Data Warehousing, AWS, IBM Cognos
Tools & AI	Generative AI, JIRA/Confluence, Postman, Splunk, Office 365

PROFESSIONAL EXPERIENCE

Cognizant Corp.

May 2026 – Present

Client: Lululemon Athletica | Role: Product Analyst – Outbound Logistics & WMS | USA

- Lead a cross-functional team of **10 (2 onshore, 8 offshore)**, including a dedicated GenAI/Automation pod, managing resourcing and delivery across **4 concurrent scrum boards** in a fast-paced environment with **bi-weekly releases** and ad-hoc deployments as needed.
- Drove **10% client cost optimization** by introducing low-barrier GenAI development tools into the automation pipeline, while improving automation efficiency by **15%** and expanding test suite coverage by **5%**.
- Overhauled automation documentation and reporting, significantly improving visibility and transparency for client stakeholders.
- Led **carrier network expansion**, onboarding a new carrier in Canada across 2 DCs for all order types, expanding an existing carrier's coverage to all US DCs, and currently driving onboarding of a new carrier in New Zealand.
- Own end-to-end **program strategy** for Outbound Logistics — from carrier onboarding to disaster recovery and peak-period performance testing — maintaining full visibility into the business flow from warehouse packing through final-mile shipment.
- Drive **technology enhancement delivery** for the in-house Logistics Portal and lead security, disaster recovery, and performance testing programs to safeguard platform resilience.
- Partner with **client leadership on SOW creation and optimization**, aligning contractual scope with evolving business priorities to balance client value and delivery feasibility.

Cognizant Corp.

February 2024 – May 2026

Client: Lululemon Athletica | Role: Lead Quality Assurance Analyst (Program & Delivery Lead) | USA

- Led a globally distributed team of **6 analysts across the US, Canada, Philippines, and India**, coordinating workflows across time zones for 24/7 productivity and seamless delivery.
- Defined and executed **long-range and short-range program strategy**, aligning delivery planning with aggressive business roadmaps for on-time delivery of high-stakes supply chain initiatives.
- Directed delivery of **major infrastructure programs**, including a Greenfield DC go-live, a Brownfield on-prem-to-SaaS Manhattan WMS migration, and enhancements across two Manhattan Active DCs.
- Served as primary **cross-functional liaison** among QA, Warehouse Operations, and Development, coordinating stakeholder alignment to validate “4-walls” functionality and integration layers, including on-site deployment support and hyper-care stabilization.
- Oversaw **end-to-end program validation** for WMS workflows (Inbound Receiving, Inventory Management, Outbound Shipping) and MHE/AutoStore systems, driving improvements to Daily Shipment SLAs and DC space optimization, backed by SQL-based data validation and IBM Cognos reporting.
- Championed an “**Automation First**” strategy, driving GenAI tooling and API-level automation adoption to cut manual documentation time and reduce regression cycle times.

Cognizant Corp.

May 2018 – November 2021

Client: Lululemon Athletica | Role: System Analyst | India

Data QA & Supply Chain Planning (Anaplan) Program

- Built automated data validation scripts using **Python (Pandas)** to accelerate large-scale Source-to-Target reconciliation across a complex ETL pipeline (PostgreSQL ODS, AWS S3, Anaplan), validating **Quarterly Demand Forecast and Sales Planning models** against strategic revenue/sales targets.
- Tested **inventory optimization logic**, including automated Transfer Order generation, to support timely replenishment and prevent stockouts.

WMS & Logistics Program

- Delivered **end-to-end program validation** for a Greenfield DC go-live, Putwall sorting rollout, and international logistics workflows (Cross-Border E-commerce, US/Canada Shipments), owning test design across the full testing pyramid (System, SIT, E2E).

EDUCATION

University of the Cumberland, USA (Graduate and Online)

Executive Master's in Business Analytics | June 2026 – December 2027 (In Progress)

University at Buffalo, The State University of New York, USA

Master's Degree | January 2022 – May 2023
